CLINIC

City Laser Clinic | Suite 304, Level 3, 84 Pitt Street Sydney CBD NSW | Call 9232 8090 to book

Laser Skin Rejuvenation has become the procedure of choice among top international and local celebrities. It is also popular amongst your average person who cannot afford time away from work to recover from more intensive procedures.

Laser Skin Rejuvenation is the term we apply to the overall treatment of the skin rather than specific lesions and pigmentation of the skin.

Laser Skin Rejuvenation treatments lead to improvements in the dermal layer, collagen fiber density, as well as increasing the amount of fibroblasts and hydroxyproline (a major component of the protein collagen) content.

**THE 5
COMMON
QUESTIONS
WE GET ASKED
ABOUT SKIN
REJUVENATION
TREATMENT**

WHAT BODY AREAS CAN BE TREATED?

The laser can be used to rejuvenate many body areas including the face, hands, neck and chest. Treatment with the Medlite Q-Switch laser is quick and requires no downtime, meaning that you can return to your normal activities immediately after treatments. There is minimal discomfort and a very low risk of any complications. Clients notice progressive improvements in the appearance of their skin over several weeks. Laser Skin Rejuvenation is compatible with most other cosmetic procedures allowing the maximum of results to be achieved. We ask that you inform your City Laser Clinic laser therapist of any other treatments or medications you may be receiving, to achieve optimal and safe results. If City Laser Clinic therapists have any concerns, you will be referred to your general medical practitioner for assessment and when in doubt, we will not treat until you are cleared medically.

IS MODERN LASER THERAPY **SAFE?**

The MedLite system laser used by City Laser Clinic for skin rejuvenation is one of the safest lasers available today. Operated by the trained, qualified and experienced laser therapists at City Laser Clinic, the Medlite Q-Switch laser offers a safe and effective treatment with very little risk of complications. People of most skin types (including tanned skin) can be safely treated.

HOW MANY LASER TREATMENTS WILL I NEED?

As with all Laser therapy treatments, the frequency and number of treatments will depend on your skin type, area affected, and the size of that area. As a guide, Laser Skin Rejuvenation usually requires 6 to 8 treatments spaced 1 to 2 weeks apart. Many clients decide to return for a maintenance laser treatment every 6 to 8 weeks after the initial course of laser treatments. Contact us and we will arrange a free laser consultation to discuss a laser treatment plan that suits your needs.

WHAT DOES THE PROCEDURE FEEL LIKE?

Laser Skin Rejuvenation is not painful. Many of our clients describe the feeling as a tingling sensation. In fact, some clients can even find this laser treatment relaxing.

ARE THERE ANY PRECAUTIONS TO TAKE DURING TREATMENT?

As with all laser treatment, especially with Laser Hair Removal and Laser Skin Rejuvenation, you must avoid exposure to direct sunlight before laser treatment, during laser treatment and for some weeks following laser treatment. At City Laser Clinic, our experienced qualified laser therapists will provide you with tailored advice depending on your skin type and the nature of the treatments that you are receiving. SPF must be applied daily.
